

Lzzy Hale Voyager, Black Diamond Holographic Sparkle

Kramer is super-stoked to announce our first artist model for a female guitarist. Lzzy Hale is the rhythm guitarist and lead singer for the hard-rockin' band Halestorm and is the first female Brand Ambassador for Gibson Brands, so a Kramer Lzzy Hale signature model is a natural fit. And what a fantastic guitar this is! Lzzy started with a pointy version of the classic Kramer Voyager body style. It's finished in an attention-grabbing Black Diamond Holographic Sparkle finish that looks incredible on stage. The Lzzy Hale Voyager has a single bridge-position Kramer 85-T™ humbucker™ and a single Volume control, along with a Floyd Rose® 1000 Series tremolo and R2 Locking Nut for rock-solid tuning stability. The 3-piece maple neck has an ebony fretboard with lightning bolt inlays, a satin finish for speed, and a Slim "C" profile for comfort. Add it all up, and you have an awesome guitar that, like the artist who helped design it, is Made to Rock Hard! A Kramer Hardshell case is also included.
