### Dave Mustaine Flying V Custom, Black Metallic

Dave Mustaine is the legendary guitarist, vocalist, songwriter, and founder of the multi-platinum selling and Grammy® Award-winning band, MEGADETH. With that legacy in mind, it's no surprise that he demands excellence from any instrument that bears his name. The new Epiphone Dave Mustaine Flying V™ Custom is no exception, delivering powerful, heavy sound and exceptional playing performance with every note.

The 24.75" scale mahogany neck has a gloriously agile ebony fretboard with 24 medium jumbo frets, an Explorer™-style headstock with Grover® Mini Rotomatic® tuners, and a Graph Tech® nut. The mahogany Flying V-style body is equipped with a LockTone™ Tune-O-Matic™ bridge, string-thru Flying V tailpiece, and Dave's signature Seymour Duncan® Thrash Factor pickups that deliver all the high-output mayhem you'd expect from a Mustaine signature axe. The pure-metal looks are rounded out with a Black Metallic finish offset with white body, neck, and headstock binding, along with black nickel hardware. A hardshell case is also included.
